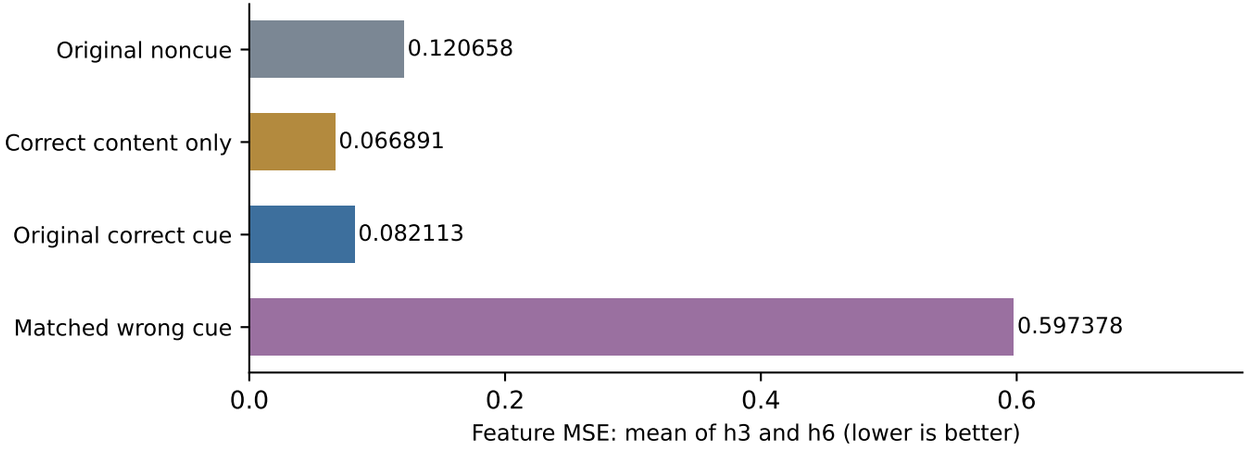
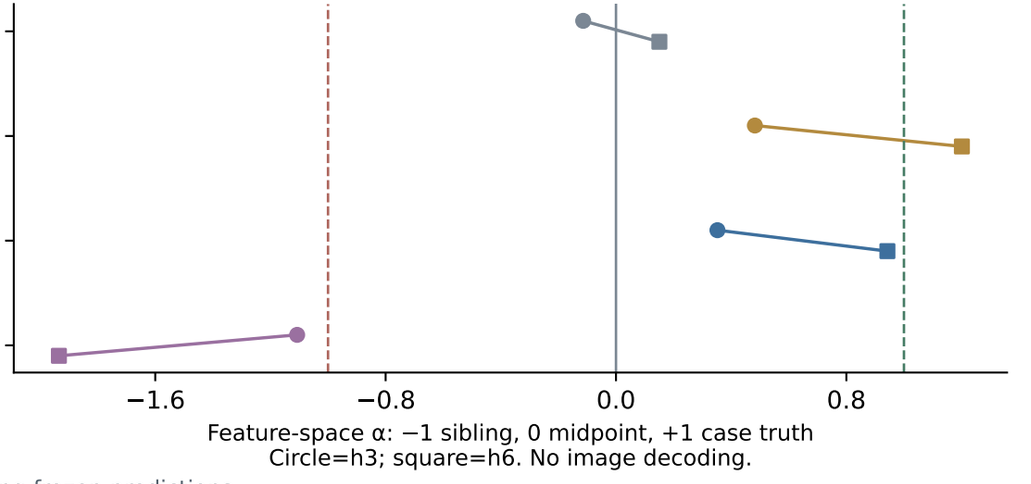
Success control: a correct cue helps after a long gap

Episode 43e7360f65e191be05005554 | shared filler t=32 | query t=36





All pictures are exact cached RGB observations / true futures. The tables and plots use existing frozen predictions.
Only three preselected examples: 27/72 comparable parents were cue-harmed. Wrong-cue content tests and hybrid inputs are evaluator-only.
